Forecast for Wednesday 14 Jul 2021

Weather: First thing patches of mist and fog will lift and disperse leaving generally dry and sunny conditions. Western hills will likely see more cloud throughout the day with the longest lived sunshine in eastern hills. Sunny in the evening but overnight cloud will thicken from the west.

Chance of cloud free mountain/hill tops above 800m: 90% throughout the day

Visibility: Generally excellent, though poor in any mist or fog patches in valleys first thing and in any patchy cloud around dawn at 200m. Patchy cloud will continue to move into western hills throughout the day with bases around 600m covering hill tops from time to time.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

With very high UV levels, even during cloudier periods, it will feel warm so water and sun protection are highly advised.

Forecast for Thursday 15 Jul 2021

Weather: A cloudier morning with a few spots of drizzle possible. Improving in the afternoon to become sunny and warm though there will be very high UV levels.

Maximum wind: Northerly 10mph gusts of 20mph.

Chance of cloud free mountain/hill tops above 800m: 60% becoming 100% by lunchtime.

Visibility: Good first thing with scattered cloud covering some hill tops with bases around 500m perhaps turning poor at times in any drizzle. Becoming excellent as all cloud bases lift above the summits by lunchtime.

Temperature: **Valleys:** Plus 14 Celsius becoming 20 Celsius.
At 800m: Plus 10 Celsius becoming 13 Celsius.
Freezing level: Above the summits.
